**7.1.3 Describe the facilities in the Institution for the management of the following types of degradable and non-degradable waste (within 500 words)**

- Solid waste management
- Liquid waste management
- Biomedical waste management
- E-waste management
- Waste recycling system
- Hazardous chemicals and radioactive waste management

**Response:**

The college has a sprawling green campus and gives top priority to keep the campus clean and eco-friendly. The faculty members and students are regularly advised to reduce waste at lower extent. Sincere students put waste in separate dustbins kept at different places at the college campus. To minimize the problems of waste disposal, separate dustbins are kept in all departments. The boards with meaningful slogans are displayed to bring environmental consciousness among the students and stakeholders. The College has implemented the following measures for the management of degradable and non-degradable wastes.

- **Solid waste management:**

The college campus has dustbins to collect wet and dry waste. It is disposed consistently. Old newspapers and old answer papers and raw paper material are sold out time to time.

- **E-waste management:**

E-waste management is available through Purchase Committee in our college. E-waste is generated in minimal amount in the college and the same is given to Registered Vendors. The Purchase Committee suggests us to sell the non-working equipments, computers, monitors, printers, and batteries etc as scrap materials.

- **Biomedical waste management:**

The college is conscious and aware regarding biomedical waste and understands its importance in maintaining sanitary conditions in the college campus. It is generated only during the Health Check-up Camp and Blood Donation Camp. All biomedical wastes are disposed after the end of the camps.

- **Hazardous chemicals and radioactive waste management:**

The college campus does not generate any hazardous chemicals and radioactive waste. Pesticides for gardens and sanitation chemicals for the washrooms are used within permissible limits and also disposed as per the government standards. The disposal of waste is effectively monitored by the maintenance committee who review the functioning on the periodic basis.
